

40" x 48" x 43" Stackable FIBC

The ALPAL 40" x 48" x 43" stackable FIBC transforms bulk packaging as you know it with superior supply chain efficiency, smart supply chain visibility, sustainability and reliability.

The smooth ALPAL pallet base, rigid plastic components, and sterile steel uprights prevent any contamination risk because of damp, pest infestation, or compromised packaging integrity. Additionally, the unit is quick and easy to clean- always keeping your packaging in pristine condition.

The interlocking stack functionality and uncompromisable strength of the steel uprights mean ALPAL can achieve an unmatched stable stack height of six units. Eliminate the risk of stack collapses- protecting both your product and employees.

Part #: DGK100120-110S

Product Specifications

Dimensions	in.	Capacity	
Exterior Height	43.3	Internal Volume (cu. ft.)	32.3
Exterior Width	39.4	Weight Capacity (lbs.)	1,323
Exterior Length	47.2	Static Loading	6
Interior Height	34.5	Dynamic Load Stack	2
Interior Width	33.5	Max. Stack Weight	7,000
Interior Length	41	Floor Type	Pallet
Collapsed Height	8.5		

Shipping		Features	
53' Trailer Load	60	Drop Doors	0
53' Trailer Collapsed	360	Door Height	N/A
Empty Return Ratio	6:1	Door Width	N/A
Fork Opening Short	10 x 4.5	Ventilation	N/A
Fork Opening Long	7.5 x 4.5	Approvals	N/A
Fork Lift Entry	4-way	Optional Lid	N/A
Weight	110 lbs.	Brand	ALPAL

Features & Benefits

- Load capacity of 1323 lbs.
- 100% Recyclable and reusable
- Can stack up to six units high
- Max stack weight of 7,000 lbs.
- Can be assembled by two people in 40 seconds
- 6:1 Return ratio
- Durable FDA-Approved plastic
- Use with temperatures of -4° to +104° F
