The 65" x 48" container lid, is designed for the 65" x 48" series of extended-length bulk containers, and provides a durable, reusable cover to protect contents during shipping and storage. Made of structural grade high-density polyethylene, the cover's overhanging lip fits securely to prevent accidental opening of the container's drop-doors. Powder-coated steel reinforcing straps ensure a tight fit of the lid. A raised surface provides added stability when stacking compatible bulk containers. Lids may be stacked and nested up to 25 pieces for compact storage.
