DuraGreen 90" x 48" extended-length lids, designed to fit perfectly with DuraGreen DGX9048-L-M series heavy-duty collapsible containers, are crafted from structural grade high-density polyethylene. This material ensures the lids are durable and reusable, providing a secure cover for bulk containers during transit or storage. The rugged, overhanging lip further enhances the security, preventing any accidental opening of the container's drop doors. The raised surface adds to the stability when stacking compatible containers. Powder-coated steel re-enforcing straps ensure rigidity over the extended-length sides of the lid. These lids can be stacked and nested up to 25 pieces, offering a compact storage solution that promotes efficiency and organization.

Height	Width	Length	Weight
4"	49"	91"	53 (lbs.)
